

DETAILS

SEEDING

Ergonomic panel for an easy control of all machine's functions.

INCLUDED ON:

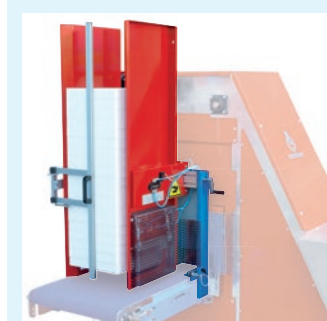

ALL SEEDING LINES

Colour touch-screen panel with intuitive graphic, easy to use for the operator.

INCLUDED ON:

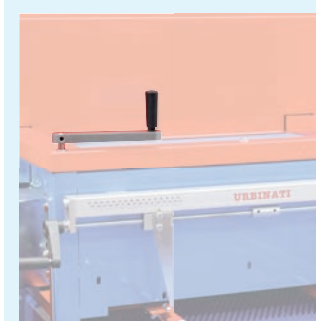

ALL SEEDING LINES

Tray denester **with 2 movements**, adjustable with one single crank.

INCLUDED ON:

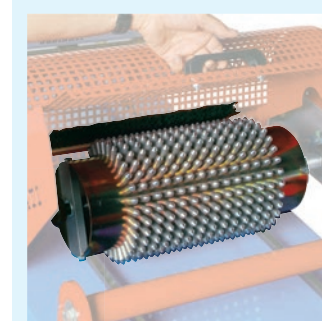

ALL SEEDING LINES

The adjustment of the tray's height, width and soil density is made with **functional cranks**.

INCLUDED ON:

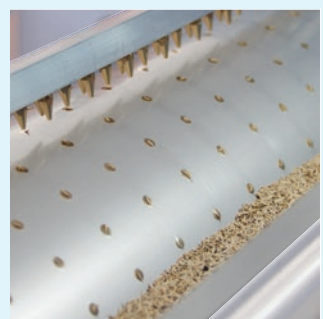

ALL SEEDING LINES

Driven dibbler with cleaning brush.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C, LAMBDA65/65C, YPSILON65/65C

Excellent seeds' singulization thanks to the **double nozzles in the blowing bar**.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C, LAMBDA65/65C, YPSILON65/65C

Easy and fast adjustment of seeding system's height and dibbler's depth, thanks to **comfortable cranks**.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C, YPSILON65/65C, KAPPA65C

Electric adjustment of the drums' height with touch-screen.

INCLUDED ON:

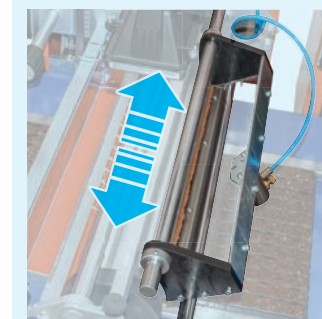

LAMBDA65/65C

Adjustable speed hammers: the vibration produced optimises the positioning of the seed in the centre of the hole.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C

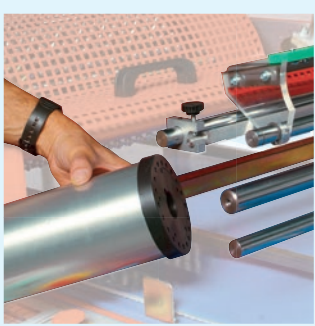

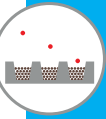

Oscillating seed holding plate to distribute the seeds **uniformly** all over the working width. It enables to work also with a small quantity of seed.

INCLUDED ON:

SIGMA80, ALFA65, BETA65/65C, LAMBDA65/65C, YPSILON65/65C

Thanks to the **modularity of the design**, our seeding lines and seeders **share common parts**.
The following pictures show some of the **most significant details**.

Fast and easy changing of the drum without any tool.

INCLUDED ON:

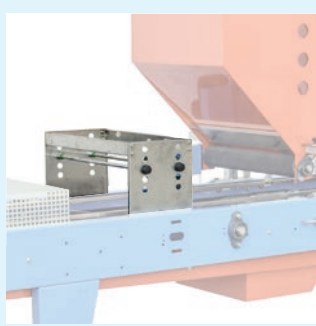

SIGMA80, ALFA65, BETA65/65C, LAMBDA65/65C, YPSILON65/65C

High-power vacuum pump: enables to use the same drum to sowing varieties of seeds of different weight.

INCLUDED ON:

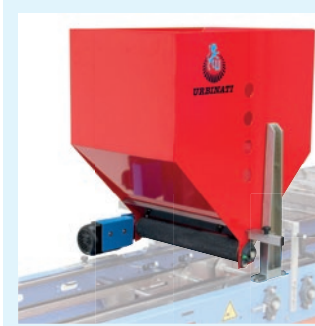

SIGMA80, ALFA65, BETA65/65C, LAMBDA65/65C, YPSILON65/65C

Watering unit with drilled bars modules: uniform watering thanks to the drilling precision, made with CNC machines.

INCLUDED ON:

ALL SEEDING LINES

Covering unit for vermiulite: it allows to obtain an uniform surfaces, even using materials with non-homogeneous granulometry.

INCLUDED ON:

ALL SEEDING LINES

Stacking unit: easy and functional **balance stacker**.

INCLUDED ON:

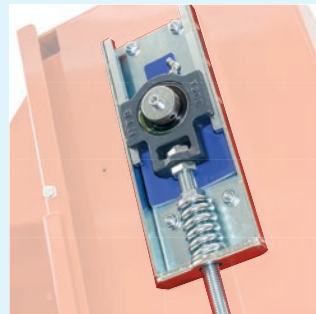

ALL SEEDING LINES

Quick self-centring guide adjustment system, to quickly adapt the guides to the width of the trays in use.

INCLUDED ON:

SIGMA80, ALFA65, BETA65, LAMBDA65, YPSILON65

Engineering solutions aimed to reduce and simplify the maintenance.

INCLUDED ON:

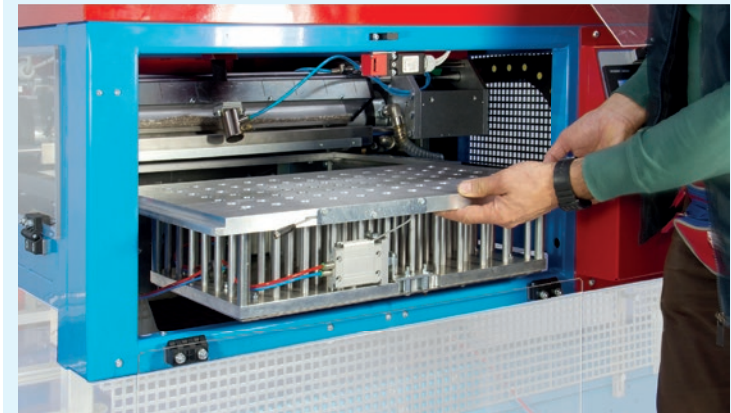

ALL SEEDING LINES

Strong manufacturing and lasting materials: the parts in contact with soil and water are in stainless steel or are hot-dip galvanised, to avoid corrosion over time.

INCLUDED ON:

ALL SEEDING LINES

Seeding plate on **sliding guides** for a **fast change**.

INCLUDED ON:

SEMBLOCK
