

Forestry seeding lines

Designed according to customers' needs and based on the seeds variety
up to 800 containers/hour

The **Urbinati forestry seeding lines** are designed according to customers' needs and based on the seeds variety: over the years, **thanks to the collaboration with relevant forestry nurseries**, Urbinati has designed lines to sowing and transplanting of **conifers** (pine, fir, spruce), **oak**, **eucalyptus**, **beech** and **maple**, with **cutting edge and completely tailor made solutions**.

The Urbinati selection for forestry nurseries includes machines able to complete the plants cycle:

TRANSPLANTING MACHINES

OUTDOOR / INDOOR IRRIGATION BOOM
