MACHINE DESCRIPTION

RW5 robotic transplanter for the transplanting of young seedlings from one container to another. It works with individually programmable wireless grippers, to better adapt to all types of trays on the market.

The RW5 transplanting machine uses **up to 12 grippers on a single row**, offering a maximum working width of 1000 mm. **Single seed trays advance system**.

Robotic transplanters are the best choice to reduce production times and labour costs and as well as increasing the uniformity and quality of the finished product.
